

HPE BLADESYSTEM C3000 ENCLOSURES

Enclosures

OVERVIEW

The HPE BladeSystem c3000 Platinum Enclosure brings unique capabilities to HPE BladeSystem.

The c3000 is ideal for:

- 1) Small offices or remote sites that have limited to no IT staff.
- 2) Applications requiring up to eight servers per enclosure.
- 3) Locations that have limited rack power and cooling capacity.
- 4) Data centers requiring power connections to an uninterruptible power supply (UPS) or 100-120V AC wall outlets.

Similar to the c7000 enclosure, the Intelligent Management through the Onboard Administrator gives you complete control of your c3000 bladed infrastructure. Each c3000 enclosure repackages the moving parts of your infrastructure cables, power supplies and fans, networking, and redundancy. The economical HPE c3000 solution includes useful features that save you time, hassles, and energy, while making change quick and easy.

The result— greater convenience during setup, maintenance, and daily operations.

FEATURES

Simple to Manage, Easy to Control

The HPE BladeSystem c3000 Platinum Enclosure goes beyond just servers. It integrates server, storage (NAS or iSCSI), networking, power/cooling, and management into a single solution that can be deployed anywhere.

The intelligent infrastructure support including Power Discovery Services allow the enclosure to communicate information to HPE Intelligent PDUs (iPDU) to automatically track enclosure power connections to the specific iPDU outlet to ensure redundancy and prevent downtime.

With the Onboard Administrator, iLO remote management, and HPE Insight Control you can manage your servers and take complete control regardless of the state of the server operating system.

Easy setup and management using tools you're used to, such as a local DVD drive for SmartStart software deployment, and a local KVM interface for local rack-based KVM integration.

Change Ready IT That Can Grow and Flex with your needs

Pre-wired and pre-configured, the c3000 Platinum Enclosure can easily implement a new server blade, simply as just plugging it in.

Support for G1 to Gen9 server blades provides investment protection throughout the life span of the enclosure.

HPE Insight Control offers essential infrastructure management that unlocks the management capabilities built into HPE ProLiant servers. Insight Control delivers powerful capabilities that enable one to proactively manage ProLiant server health either physical or virtual.

Virtual Connect architecture delivers wire once, and then add, replace, or recover blades on the fly without impacting networks and storage or creating extra steps.

Reduce Up-front Capital and Ongoing Management Costs

Costs less than equivalent rack-mounted servers (at 3 servers or more)

Use up to 94% less cables and 40% less space when compared to equivalent 1U rack mount servers

Deploy anywhere with a choice of UPSs, PDUs and 100-120V AC low-line wall outlet power, as well as a options for 200-240V AC high-line and -48V DC power.

HPE Thermal Logic technologies combine energy-reduction technologies- such as 80 PLUS certified, 94% efficient HPE Platinum Power Supplies- with pinpoint measurement and control through Dynamic Power Capping, to save energy and allocate power and cooling resources more efficiently.

c3000 and c7000 enclosure compatibility with many of the same critical components such as servers, interconnects, mezzanine cards, and storage blades.

Technical specifications

HPE BladeSystem c3000 Enclosures

| | |
|------------------------------|---|
| System fan features | Hot plug redundant standard. |
| Form factor | 6U |
| BladeSystem supported | Yes, please reference the QuickSpecs for details |
| Management features | Redundant Onboard Administrator - LAN and serial access optional HPE Insight Control. |
| Power availability | Hot plug, N+1 and N+N redundancy. Please reference the QuickSpecs for various power options and requirements. |

HPE POINTNEXT

Access expertise at every step of your IT journey with [HPE Pointnext Services](#). [Advisory Services](#) focuses on your business outcomes and goals, to design your transformation and build a roadmap tuned to your unique challenges. Our [Professional](#) and [Operational Services](#) help speed up time-to-production and keep your IT stable and reliable.

Operational Services from HPE Pointnext Services

- [HPE Datacenter Care](#) helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
- [HPE Proactive Care](#) offers an enhanced call experience and helps reduce problems with personalized proactive reports and advice. This also includes collaborative software support for Independent Software Vendors (ISVs), (Red Hat, VMWare, Microsoft, etc.). [Read more](#)
- [HPE Foundation Care](#) helps when there is a problem and has a choice of response levels. Collaborative software support is included and provides troubleshooting help for ISVs running on your server. [Read more.](#)

Other related services

[Defective Media Retention](#) is optional and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

[HPE Service Credits](#) offers a menu of technical services, access additional resources, and specialist skills.

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
